

Subpart E—Safeguarding**§ 2001.40 General.**

(a) Classified information, regardless of its form, shall be afforded a level of protection against loss or unauthorized disclosure commensurate with its level of classification.

(b) Except for foreign government information, agency heads or their designee(s) may adopt alternative measures, using risk management principles, to protect against loss or unauthorized disclosure when necessary to meet operational requirements. When alternative measures are used for other than temporary, unique situations, the alternative measures shall be documented and provided to the Director of ISOO. Upon request, the description shall be provided to any other agency with which classified information or secure facilities are shared. In all cases, the alternative measures shall provide protection sufficient to reasonably deter and detect loss or unauthorized disclosure. Risk management factors considered will include sensitivity, value, and crucial nature of the information; analysis of known and anticipated threats; vulnerability; and countermeasure benefits versus cost.

(c) North Atlantic Treaty Organization (NATO) classified information shall be safeguarded in compliance with U.S. Security Authority for NATO Instruction (USSAN) 1-07. Other foreign government information shall be safeguarded as described herein for U.S. information except as required by an existing treaty, agreement or other obligation (hereinafter, obligation). When the information is to be safeguarded pursuant to an existing obligation, the additional requirements at § 2001.54 may apply to the extent they were required in the obligation as originally negotiated or are agreed upon during amendment. Negotiations on new obligations or amendments to existing obligations shall strive to bring provisions for safeguarding foreign government information into accord with standards for safeguarding U.S. information as described in this Directive.

(d) *Need-to-know determinations.* (1) Agency heads, through their designees, shall identify organizational missions

and personnel requiring access to classified information to perform or assist in authorized governmental functions. These mission and personnel requirements are determined by the functions of an agency or the roles and responsibilities of personnel in the course of their official duties. Personnel determinations shall be consistent with section 4.1(a) of the Order.

(2) In instances where the provisions of section 4.1(a) of the Order are met, but there is a countervailing need to restrict the information, disagreements that cannot be resolved shall be referred by agency heads or designees to either the Director of ISOO or, with respect to the Intelligence Community, the Director of National Intelligence, as appropriate. Disagreements concerning information protected under section 4.3 of the Order shall instead be referred to the appropriate official named in section 4.3 of the Order.

§ 2001.41 Responsibilities of holders.

Authorized persons who have access to classified information are responsible for:

(a) Protecting it from persons without authorized access to that information, to include securing it in approved equipment or facilities whenever it is not under the direct control of an authorized person;

(b) Meeting safeguarding requirements prescribed by the agency head; and

(c) Ensuring that classified information is not communicated over unsecured voice or data circuits, in public conveyances or places, or in any other manner that permits interception by unauthorized persons.

§ 2001.42 Standards for security equipment.

(a) *Storage.* The Administrator of the General Services Administration (GSA) shall, in coordination with agency heads originating classified information, establish and publish uniform standards, specifications, qualified product lists or databases, and supply schedules for security equipment designed to provide secure storage for classified information. Whenever new secure storage equipment is procured, it shall be in conformance with the

§ 2001.43

standards and specifications established by the Administrator of the GSA, and shall, to the maximum extent possible, be of the type available through the Federal Supply System.

(b) *Destruction.* Effective January 1, 2011, only equipment listed on an Evaluated Products List (EPL) issued by the National Security Agency (NSA) may be utilized to destroy classified information using any method covered by an EPL. However, equipment approved for use prior to January 1, 2011, and not found on an EPL, may be utilized for the destruction of classified information until December 31, 2016. Unless NSA determines otherwise, whenever an EPL is revised, equipment removed from an EPL may be utilized for the destruction of classified information up to six years from the date of its removal from an EPL. In all cases, if any such previously approved equipment needs to be replaced or otherwise requires a rebuild or replacement of a critical assembly, the unit must be taken out of service for the destruction in accordance with this section. The Administrator of the GSA shall, to the maximum extent possible, coordinate supply schedules and otherwise seek to make equipment on an EPL available through the Federal Supply System.

§ 2001.43 Storage.

(a) *General.* Classified information shall be stored only under conditions designed to deter and detect unauthorized access to the information. Storage at overseas locations shall be at U.S. Government-controlled facilities unless otherwise stipulated in treaties or international agreements. Overseas storage standards for facilities under a Chief of Mission are promulgated under the authority of the Overseas Security Policy Board.

(b) *Requirements for physical protection—(1) Top Secret.* Top Secret information shall be stored in a GSA-approved security container, a vault built to Federal Standard (FED STD) 832, or an open storage area constructed in accordance with § 2001.53. In addition, supplemental controls are required as follows:

(i) For GSA-approved containers, one of the following supplemental controls:

(A) Inspection of the container every two hours by an employee cleared at least to the Secret level;

(B) An Intrusion Detection System (IDS) with the personnel responding to the alarm arriving within 15 minutes of the alarm annunciation. Acceptability of Intrusion Detection Equipment (IDE): All IDE must be in accordance with standards approved by ISOO. Government and proprietary installed, maintained, or furnished systems are subject to approval only by the agency head; or

(C) Security-In-Depth coverage of the area in which the container is located, provided the container is equipped with a lock meeting Federal Specification FF-L-2740.

(ii) For open storage areas covered by Security-In-Depth, an IDS with the personnel responding to the alarm arriving within 15 minutes of the alarm annunciation.

(iii) For open storage areas not covered by Security-In-Depth, personnel responding to the alarm shall arrive within five minutes of the alarm annunciation.

(2) *Secret.* Secret information shall be stored in the same manner as Top Secret information or, until October 1, 2012, in a non-GSA-approved container having a built-in combination lock or in a non-GSA-approved container secured with a rigid metal lockbar and an agency head approved padlock. Security-In-Depth is required in areas in which a non-GSA-approved container or open storage area is located. Except for storage in a GSA-approved container or a vault built to FED STD 832, one of the following supplemental controls is required:

(i) Inspection of the container or open storage area every four hours by an employee cleared at least to the Secret level; or

(ii) An IDS with the personnel responding to the alarm arriving within 30 minutes of the alarm annunciation.

(3) *Confidential.* Confidential information shall be stored in the same manner as prescribed for Top Secret or Secret information except that supplemental controls are not required.

(c) *Combinations.* Use and maintenance of dial-type locks and other changeable combination locks.

32 CFR Ch. XX (7–1–13 Edition)
